Roshan Prajapati

Product Manager

Ranchi, Jharkhand | hustlersbayro@gmail.com | 7209539208 | linkedin.com/in/roshanprajapati-pm/

PROFESSIONAL SUMMARY

I started as a Software Engineer shipping e-commerce features — work that taught me what's feasible to build, where technical debt bites, and how release risk really behaves. That grounding is why I moved into Product: I scope realistically, work fluently with engineering, and know the difference between a good PRD and one that survives a sprint. In my first 10 months as a titled Product Manager, I've applied that technical foundation to real roadmap ownership, and built on it further with a certification in Product Management with Generative & Agentic AI (BITSoM, with Masai School). I'm targeting Product Manager roles building AI-driven, developer-facing products — where technical fluency and structured execution matter as much as vision.

CORE SKILLS

Product Strategy & Roadmapping • Generative & Agentic AI Fundamentals • Technical Feasibility Scoping • Cross-functional Leadership • Market & Competitor Research • A/B Testing • Agile/Scrumaster • Stakeholder Management

PROFESSIONAL EXPERIENCE

Product Manager — Accenture *Oct 2025 – Present*

- In my first 10 months as Product Manager, took ownership of the roadmap for e-commerce platform features, translating customer needs and market insight into prioritized requirements and user stories for engineering teams.
- Improved sprint velocity by 18% and reduced delivery cycle time by 2 days by tightening requirement clarity and definition-of-ready standards.
- Led UAT and quality processes across 4 releases, reducing post-release defect rate by 22% for a product serving millions of end users.
- Applied structured coursework in generative AI and agentic AI architectures to evaluate AI-powered product recommendations and customer-insight opportunities for the roadmap.
- Partnered with engineering, design, and business stakeholders to prioritize quarterly roadmap initiatives, balancing short-term delivery with long-term goals; recognized with Star Performer & Spotlight Awards for execution and leadership.

Senior Software Engineer — Accenture *Sept 2023 – Sept 2025*

- Partnered directly with product and design during planning, regularly translating ambiguous business requirements into technical scope for a team of 5 engineers — the direct precursor to my move into product.
- Led design and development of 12 e-commerce features, owning technical tradeoff decisions that balanced speed, cost, and user experience.
- Identified and mitigated delivery risks across 35+ sprints, contributing to a 15% improvement in on-time sprint completion.
- Mentored 3 junior engineers on implementation standards and code quality.

Software Engineer — Accenture *Aug 2022 – Aug 2023*

- Built and shipped 7 e-commerce platform features end-to-end, collaborating with QA and product through full UAT cycles for a large, active user base.
- Contributed to workflow automation efforts that reduced manual QA effort by 15%.
- Participated in Agile ceremonies and contributed to continuous delivery of user-facing features across 20+ sprint cycles.

Software Engineer Intern (Frontend, React) — Cognizant *Jan 2022 – Aug 2022*

- Built and maintained responsive UI components in React for production-facing features, gaining early exposure to Agile ceremonies and cross-functional collaboration with senior engineers and QA.

INDEPENDENT PROJECTS

- SalesPulse — AI-Powered B2B Sales Intelligence Platform (Product Case Study): Defined market segmentation, positioning, and MVP scope for an AI sales co-pilot concept; prioritized features using RICE scoring and a Value vs. Complexity matrix, and built a phased GTM plan targeting mid-sized B2B SaaS and e-commerce sales teams.

EDUCATION

B.Tech in Electrical & Electronics Engineering — Lakshmi Narain College of Technology, 2022 — SGPA: 9.01

CERTIFICATIONS & ACHIEVEMENTS

- **Certificate of Excellence in Evaluation — Product Management with Generative & Agentic AI, BITSoM (Centre for Executive & Professional Development), in collaboration with Masai School — 2026**
- Star Performer & Spotlight Award — Project Execution & Leadership, Accenture
- Tools & Technologies: Jira, Figma, Amplitude/Mixpanel, Productboard, Git, GitHub, VS Code, React.js, JavaScript, HTML, CSS, C++,Scrumaster
